

## I. Wayne Woolsey 1931 -

Mr. Wayne Woolsey is a petroleum geologist with 48 years of strategic involvement in the petroleum, gas gathering, and gas processing industries. He obtained a B.A. from the University of North Texas in 1951 and an M.S. in Geology from Texas A&M University in 1958. He was formerly a District Geologist with Texaco, Inc. and during 10 years of employment conducted petroleum exploration activity covering a large portion of the continental United States. Through his association with Texaco and as an independent, Mr. Woolsey has acquired a working knowledge of most of the domestic petroleum provinces and has detailed experience in many of them. For the last 30 years he has worked the mid-continent basins of Kansas, Oklahoma, and Texas. He is a member of several scientific and professional societies. Mr. Woolsey has been the owner, president, and chief executive officer of Woolsey Energy Corporation and its predecessor Woolsey Petroleum Corporation since the corporation started in 1978. As the owner of an independent oil and gas company, his hands-on experience in exploration and operations covers the varied components of an independent company.

The Woolsey companies are located in Wichita, Kansas, with a field office in Medicine Lodge, Kansas.
